

MOSTAFA MANSOUR AL-ASHRY

QA Automation Engineer | AI/RAG Quality Testing

mostafaalashry35@gmail.com | +20 102 303 1182 | Cairo, Egypt | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

ISTQB-certified QA Automation Engineer (CTFL v4.0 & CT-GenAI) with hands-on experience in web, mobile, API, and AI/RAG testing. Experienced in building and maintaining Java-based automation frameworks using Selenium, Appium, REST Assured, TestNG, and Allure. Also experienced in validating GenAI workflows involving MCP tools, vector search, grounded responses, citations, and vision-based diagnosis pipelines. Comfortable testing services across Next.js, Node.js, Spring Boot, MongoDB Atlas, Docker, AWS-hosted environments, and CI/CD pipelines.

TECHNICAL SKILLS

Automation Testing: Selenium WebDriver | Appium (Native & Hybrid) | REST Assured | TestNG | Maven | JUnit | Page Object Model | Data-Driven Testing | Layered Test Architecture | Parallel Execution
Quality & AI: Model Context Protocol (MCP) | RAG Validation | Groundedness & Citations | Multimodal/Vision AI Testing | Vector Search Testing | Prompt & Tool-Calling Verification | CT-GenAI
Performance & Manual: Apache JMeter | Concurrency & Load Testing | Functional | Regression | Exploratory Testing | Bug Reporting | Jira | Agile/Scrum
Backend, Data & Cloud: Java | Spring Boot | Node.js | Next.js | TypeScript | PostgreSQL | REST APIs | Docker | AWS-hosted Environments | Git | GitHub Actions | CI/CD | Allure

PROFESSIONAL EXPERIENCE

QA Automation & AI Quality Engineer – Greenalytics Jun 2026 – Present
AI-powered Precision Agriculture Platform | Cairo, Egypt

- RAG & MCP Workflows:** Tested RAG workflows connecting Claude to FastMCP tools, validating retrieval relevance, citations, and grounded answer behavior against scientific references.
- Multimodal Vision AI Testing:** Validated crop disease image diagnosis flows, testing symptom classification from uploaded leaf imagery, multi-turn prompt behavior, and edge-case dispute handling.
- Vector Search & Embeddings:** Validated embedding generation, MongoDB Atlas vector search behavior, similarity thresholds, and retrieval accuracy.
- HITL Quality Loop:** Tested human-in-the-loop dispute workflows across Next.js and Node.js/TypeScript, verifying that reviewed farmer corrections sync properly to company knowledge after admin approval.
- E2E Automation:** Introduced the platform's first automated E2E test suite from scratch covering critical user workflows, reducing developer manual regression effort and validating Docker/AWS-hosted deployments.

Freelance QA Tester – uTest / Testlio 2025 – Present

- Executed exploratory and functional test cycles on production web and mobile apps for international clients across diverse OS/browser environments.
- Submitted structured bug reports with detailed reproduction steps, network logs, device console traces, and proof-of-concept media.

SELECTED FULL-STACK & QA PROJECTS

Multi-Tenant Cafe & Restaurant Management SaaS [with AI Assistant]
Full-Stack Development & AI QA Project

- Developed and tested a multi-tenant ordering platform, integrating an AI ordering assistant via a custom **MCP server** for conversational table ordering and menu querying.
- Built test coverage for QR order lifecycles, kitchen ticket routing (KDS), inventory auto-deduction, and tool-calling execution across backend APIs.

Tech: Java | Spring Boot | PostgreSQL | React | TypeScript | Model Context Protocol (MCP) | REST APIs | Docker

Multi-Company Real Estate CRM SaaS
Full-Stack Development & Performance/QA Project

- Developed and tested a multi-tenant CRM covering authentication, lead tracking, broker permissions, reminders, and company data isolation.
- Performance Testing:** Executed load testing using **Apache JMeter**; identified performance bottlenecks in heavy endpoints and database queries under concurrent user load.

Tech: Java | Spring Boot | PostgreSQL | Apache JMeter | Flyway | JavaScript | Bootstrap | GitHub Actions

Selenium UI Automation Framework [\[GitHub\]](#)

- Implemented automation for 26 E2E test cases across 8 suites using Page Object Model, a layered test architecture, thread-safe parallel TestNG runs, and JSON-driven POJO data mapping with Allure reporting.

Tech: Java | Selenium WebDriver | TestNG | Maven | Allure

Mobile Automation Framework (Appium) [\[GitHub\]](#)

- Designed and automated 19 scenarios for Native and WebView testing using dual-layer architecture, reusable touch gestures (swipe, tap), and parallel execution.

Tech: Java | Appium | UiAutomator2 | TestNG | Maven | Allure

REST API Automation Framework [\[GitHub\]](#)

- Built automated test coverage for 14 CRUD API operations utilizing Service Layer architecture, dynamic request builders, Jackson POJO response serialization, and response validation suites.

Tech: Java | REST Assured | TestNG | Maven | Allure

EDUCATION & CERTIFICATIONS

ISTQB Certified Tester – Testing with Generative AI (CT-GenAI) June 2026
ISTQB Certified Tester – Foundation Level (CTFL v4.0) February 2026
Automation Testing Diploma – Edges Academy Dec 2025 – Mar 2026
Postgraduate Diploma in Public Law – Faculty of Law 2025 – 2026
Bachelor of Law – Honors, 95% June 2025

LANGUAGES

Arabic: Native | **English:** Professional Working Proficiency
